

FOR IMMEDIATE RELEASE

Tail-f Systems Drives Industry Standards for Service Availability

Tail-f Joins Service Availability Forum and Will Contribute to Network Management Applications

LEESBURG, VA and STOCKHOLM, Sweden, August 7, 2007 – Tail-f Systems, a leading software developer of XML-based network management solutions, today announced its membership in the Service Availability (SA) Forum™. The SA Forum™ is a consortium of industry-leading communications and computing companies working together to foster the use of commercial off-the-shelf building blocks in the creation of high availability network infrastructure products, systems and services.

As a Contributor Member, Tail-f will participate in specification work groups, receive early access to specifications, and be allowed to use SA Forum trademarks. Tail-f will also share intellectual property, review and comment on specifications, and provide either technical or marketing resources.

“We are very pleased to join the Service Availability Forum,” said Hakan Millroth, President and CEO, Tail-f Systems. “Network management has become one of the critical factors in delivering highly available networks and we look forward to contributing our resources to the valuable standardization work being undertaken by the Forum.”

“Tail-f Systems is a leader in delivering carrier-grade network management software for communications infrastructure equipment manufacturers,” said Asif Naseem, SA Forum President. “Their contributions to the Forum will help the industry continue to benefit from the value of standards-based, commercial-off-the-shelf solutions.”

About Tail-f Systems

Tail-f Systems is the leading software developer of XML-based network management software for network equipment suppliers. Customers using Tail-f’s technology radically reduce their

time-to-market and benefit from carrier-grade implementations of NETCONF, CLI, Web, and SNMP interfaces. Tail-f is a venture-funded company headquartered in Stockholm.
