

FOR IMMEDIATE RELEASE

Tail-f Systems Launches Enterprise Solutions Program

Industry Leading ConfD Network Management Software is Available in New Enterprise Edition

STOCKHOLM, Sweden – September 11, 2007 – Tail-f Systems, a leading software developer of XML-based network management solutions, announced today the release of ConfD Enterprise Edition. This new release packages the ConfD capabilities best suited to the needs of enterprise networking equipment vendors.

“As enterprise networks become increasingly sophisticated, equipment vendors are being required to upgrade their network management systems,” said Dennis Drogseth, Vice President of Enterprise Management Systems, a leading research and consulting firm. “We expect tools to help enterprise networking vendors rapidly build next-generation network management systems will become increasingly popular.”

ConfD Enterprise Edition leverages the proven software that has been successfully deployed by equipment vendors in the carrier space. Enterprise customers will be able to build comprehensive XML-based, on-device network management applications with key northbound interfaces, including a CLI, Web Interface, and SNMP Agents. The Enterprise Edition includes a high-performance Embedded XML data store tuned for the requirements of network management applications. A complete on-device network management system can be rapidly developed conserving engineering resources for other priorities.

"Our initial focus has been on meeting the needs of telecommunications equipment vendors with a robust software platform designed to meet the performance and scalability needs of carrier-grade applications," said Hakan Millroth, Tail-f Systems' CEO. "The growing breadth and complexity of enterprise networks has created demand for powerful network management functionality that can be operated with minimal administration costs. As this need mirrors the carrier-class network requirements, Tail-f's ConfD is uniquely positioned to solve the challenges faced in the enterprise."

ConfD Enterprise Edition is available immediately and will be sold and supported through Tail-f Systems global sales and partner network.

About Tail-f Systems

Tail-f Systems is the leading software developer of XML-based network management software for network equipment suppliers. Customers using Tail-f's technology radically reduce their time-to-market and benefit from carrier-grade implementations of NETCONF, CLI, Web, and SNMP interfaces. Tail-f is a venture-funded company headquartered in Stockholm.
